

Thriving ICT Programme

A Enterprise & Supplier
Development (ESD)
implementation proposal:
developing capable,
digitally enabled Black-
owned businesses.

Inform. Inspire. Celebrate. Elevate.

ESD that builds businesses that last.

Every ESD programme is an investment in the growth of Black-owned businesses. We design and run programmes that give each business practical capability it keeps — and give you clear evidence of what your investment built.

WHAT WE DELIVER

For the businesses you support: tailored tools, systems and support that become part of how they operate every day.

For your ESD team: a clear, documented picture of how each business is progressing — and which are ready for their next stage.

For your organisation: credible impact stories and evidence that bring your ESD investment to life for your board, stakeholders and wider audiences.

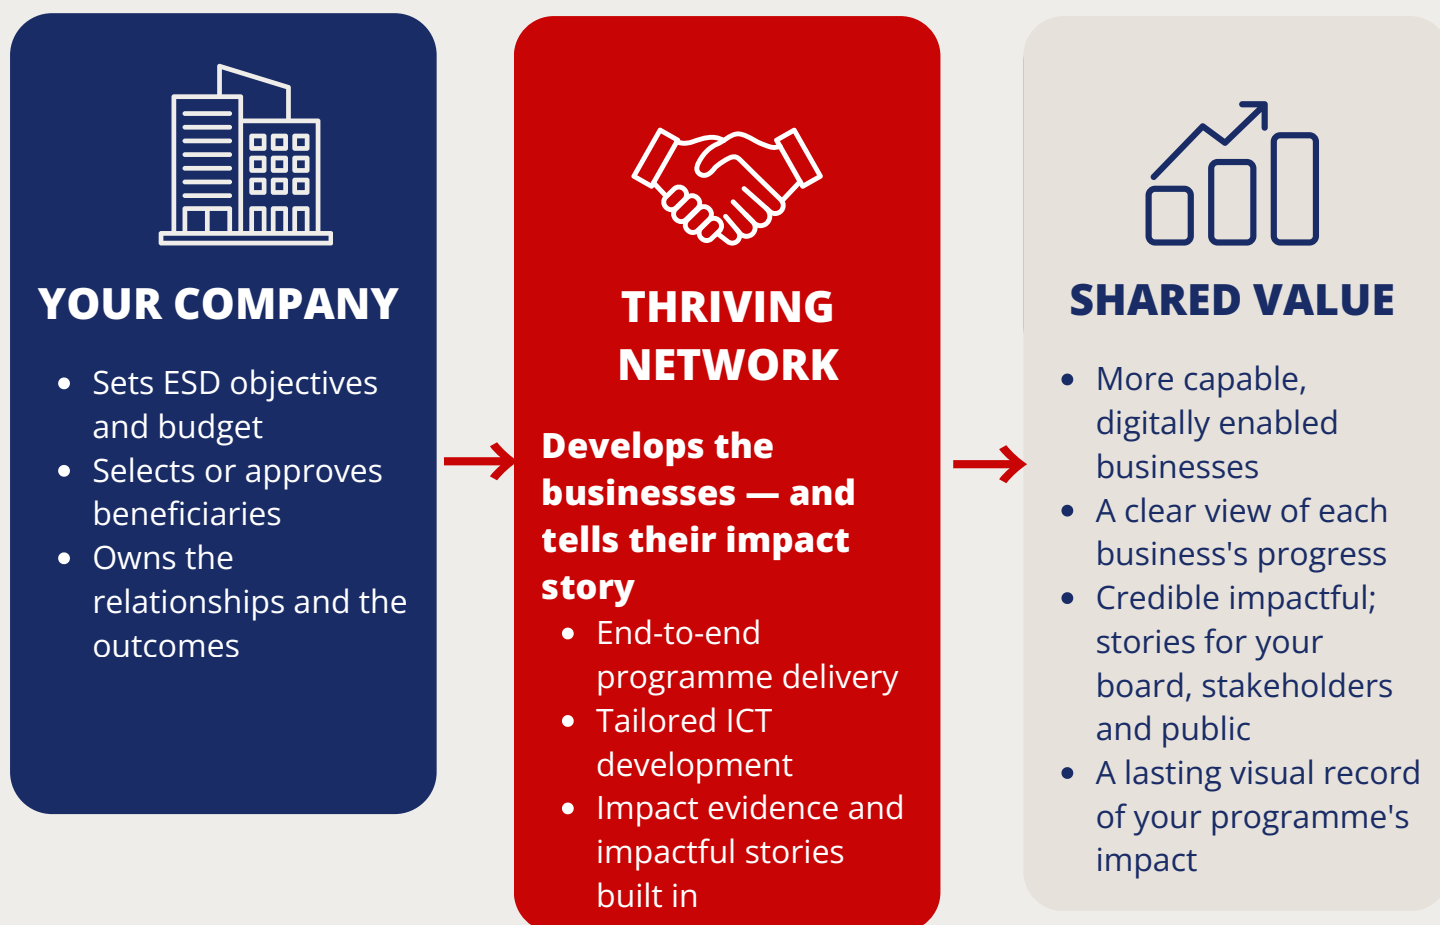

We develop the businesses. We amplify the impact.

HOW WE WORK WITH YOU

We design and run your ESD programme end to end — from beneficiary recruitment and needs analysis to tailored enablement, reporting and graduation — aligned to your ESD objectives and your B-BBEE advisor's targets.

Thriving Network is your ESD Development Partner.

Since 2016, we have helped entrepreneurs access the tools, knowledge, networks and opportunities they need to build sustainable businesses — and helped corporates see what their investment has built.

One partner for development, evidence and visibility — from recruitment to graduation.

Four steps. One connected journey.

Every programme follows the same logic — from understanding each business to showing what changed.

1

DIAGNOSE

Understand each business

- Needs analysis for every business
- Baseline of systems, compliance and capability
- A tailored development pathway

2

ENABLE

Build practical capability

- ICT tools and business systems
- Training, mentorship and coaching
- Procurement readiness and market access

3

EVIDENCE

Document what changed

- An Impact Development Journey for each business
- Progress from baseline to graduation
- Audit-ready evidence pack

4

AMPLIFY

Make the impact visible

- Beneficiary profiles and case studies
- Digital Assets
- Broadcast on Thriving Media and your channels

**BUILD THE CAPABILITY.
CAPTURE THE IMPACT.
CREATE LASTING VALUE.**

A structured 12-week programme.

Cohorts of 20 businesses, delivered through a blended model of training, mentorship, digital enablement and supplier readiness — with milestones tracked throughout.

1

WEEK 1

Needs analysis & baseline

Every business completes a diagnostic assessment and is placed on a development pathway matched to its maturity, industry and your objectives.

2

WEEKS 2-10

Training, enablement & mentorship

Tailored ICT tools and systems, practical training and structured coaching, delivered according to each business's plan.

3

WEEKS 11-12

Readiness & final reporting

Supplier readiness, Dealroom preparation, progress assessment and final evidence pack.

4

GRADUATION

Certificates, profiles & showcase

Completion certificates, corporate-ready supplier profiles and a graduation showcase with your stakeholders.

Needs analysis first. Then tailored enablement.

Two tracks, aligned to your ESD objectives.

Choose the track that matches your goals — or run both within one cohort.

TRACK 1: SUPPLIER DEVELOPMENT

For Black-owned suppliers already in your value chain

- Stronger operational efficiency
- Improved delivery capability
- Digital systems implemented
- Supplier compliance readiness

TRACK 2: ENTERPRISE DEVELOPMENT

For emerging businesses building towards procurement

- Structured foundation enablement
- Business systems and compliance
- A pipeline of future suppliers
- Aligned to your procurement objectives

BOTH TRACKS INCLUDE

A needs analysis and tailored pathway

Practical tools that stay in the business

An Impact Development Journey per business

Audit-ready reporting and evidence pack

Supplier development and enterprise development — delivered with the same rigour.

No two businesses start in the same place. Neither should their support.

Even within the same industry, businesses face different challenges and priorities. The needs analysis places each one on a pathway — and one cohort can include all three.

FOUNDATION

"The basics are in place."

For businesses building their digital and compliance foundation.

- Compliance documentation
- Professional email and domain
- Digital basics and record keeping

OPTIMISATION

"The business runs on systems."

For businesses ready to operate more efficiently.

- Quoting and invoicing
- CRM and bookkeeping
- WhatsApp Business and online presence

SCALE

"Ready for the next opportunity."

For businesses preparing for corporate supply chains.

- Capability statement
- Supplier profile and KPIs
- Procurement readiness and Dealroom

Modules selected by need, not by default.

The programme is the toolkit. The needs analysis tells us which tools each business actually needs.

1. ICT Tools & Productivity

Digital literacy, Microsoft 365 or Google Workspace, professional email and domains.

2. Cybersecurity & Communications

Cybersecurity awareness and basic controls, plus VoIP and business communications readiness.

3. Business Systems & CRM

Quoting, invoicing, CRM (HubSpot, Zoho or equivalent) and workflow automation.

4. Financial Management & Compliance

Bookkeeping tools and support with CIPC, SARS and B-BBEE affidavit guidance.

5. Sales & Digital Presence

WhatsApp Business, websites and online profiles that help businesses find and serve customers.

6. Procurement Readiness & Mentorship

Supplier onboarding requirements, business coaching, mentorship and growth planning.

Development that stays in the business.

Training matters. But the most durable ESD support is capability a business keeps using long after the programme ends.

WHAT EACH BUSINESS KEEPS

- **Tools and systems it keeps:** the software, accounts and set-ups in its development plan stay in place after graduation.

- **Capability for the whole team:** systems serve employees, not just the owner, and become part of daily operations.

- **A professional presence:** a domain, email, digital profile and documentation that build credibility with customers and buyers.

- **A clear plan for sustainability:** software licences are included for 12 months, then transferred to the business.

- **A plan for what's next:** each business graduates knowing its next priorities.

Tangible support. Lasting capability.

WHAT WE REPORT ON

Our programme builds operational capability, so that is what we measure: systems in use, compliance status, digital presence and procurement readiness. Where a business can verify revenue or jobs, we document those too.

Every business, documented from its first day to a year after graduation.

Each business has an Impact Development Journey: a structured record that gives you a clear, verifiable view of its progress.

1

AT ENTRY

Where did the business start?

- Ownership, sector and location · Systems, compliance and challenges · Baseline from the needs analysis

2

DURING DEVELOPMENT

What support was received?

- Development pathway · Tools, systems and training provided · Mentorship and milestones

3

AT GRADUATION

What changed?

- Systems now in use
- Compliance and digital presence
- Readiness for the next stage

4

6-12 MONTHS LATER

What happened next?

- Continued use of systems
- Growth and new opportunities
- Further support needed

We report what we can verify — and give you a clear view of which businesses are ready for their next stage.

Audit-ready reporting, built for governance.

Every programme closes with a complete evidence pack aligned to your ESD reporting and verification requirements.

✓ Beneficiary database and profiling records

✓ Needs analysis and baseline assessment outcomes

✓ Signed attendance registers and completion tracking

✓ Supplier improvement and action plans

✓ Impact Development Journey for each business

✓ Board-ready final impact report

✓ Signed onboarding documents and participation agreements

✓ Training curriculum, schedules and learning records

✓ Mentorship logs and coaching session records

✓ Monthly progress reports and milestone dashboards

✓ Beneficiary completion certificates

✓ Full audit-ready ESD evidence pack

Reporting your governance and verification teams can rely on.

Every tier includes impact you can amplify.

Impact & Amplification is built into the programme. We turn each business's journey into credible impact stories on Thriving Media channels and your own channels — so your investment is visible as well as delivered.

LinkedIn & Press

Beneficiary profiles and thought leadership, with outreach to business and trade publications.

TikTok

Authentic, direct-to-camera content for youth and entrepreneur audiences. Per agreed content plan.

Instagram Reels

Short, visual moments that lead audiences to the full story. Per agreed content plan.

Facebook

Full stories and updates shared with Thriving Network's entrepreneur community.

YouTube

Documentary-style flagship episodes and interviews — permanent, searchable and easy to share.

Radio & Media Partners

Extended reach through our media relationships, subject to editorial acceptance.

Every digital asset is approved by you before publication, consented by participants, and handed over for your own reports and channels.

Different platforms. One consistent story.

From ready to connected.

For businesses on the Scale pathway, the Thriving Supplier Dealroom creates structured opportunities to meet corporate buyers and procurement teams.

Supplier Pitch Sessions

Graduates present their capabilities to buyers and partners.

Buyer Engagement Rooms

Focused conversations between suppliers and procurement teams.

Corporate-Ready Supplier Profiles

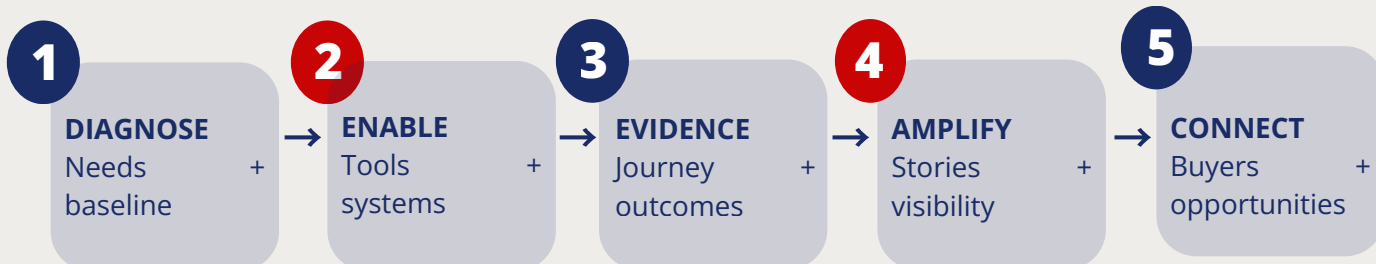

Professional profiles and capability statements buyers can act on.

Supplier Directory

A searchable record of programme graduates and their capabilities.

Introductions & Follow-Up

Market access support where genuine opportunities exist. Virtual or in person.

We prepare businesses for opportunities.

Choose the depth. We tailor the detail.

Each tier combines a development investment with an Impact & Amplification layer, priced for a cohort of 20. The needs analysis decides how each business's allocation is used. All prices exclude VAT.

BRONZE — ICT ENABLEMENT

Best for foundational digital enablement

DEVELOPMENT
R350,000 – R550,000

IMPACT & AMPLIFICATION
R55,000

TOTAL
R405,000 – R605,000

- Needs analysis, tailored development plans, digital tools, cybersecurity basics and compliance readiness
- Impact layer: evidence pack and digital assets for every SME

SILVER — ICT + GROWTH

Best for operational and procurement readiness

DEVELOPMENT
R650,000 – R950,000

IMPACT & AMPLIFICATION
R140,000

TOTAL
R790,000 – R1,090,000

- Everything in Bronze, plus CRM, WhatsApp Business, website, bookkeeping, mentorship and a pitch session
- Impact layer: adds 3 case studies with short video

GOLD— ICT Supplier Development

Best for building an active supplier pipeline

DEVELOPMENT
R1,200,000 – R2,000,000+

IMPACT & AMPLIFICATION
R270,000

TOTAL
R1,470,000 – R2,270,000+

- Everything in Silver, plus supplier performance plans, Dealroom activation and dedicated programme management
- Impact layer: adds a flagship Thriving Media episode, executive interview and graduation coverage

Quoted separately: devices, connectivity and other optional add-ons (next page) · travel outside Gauteng · extended amplification campaigns

Every tier includes Impact & Amplification — so your investment is visible, not just delivered.

Tangible extras, **quoted to your budget**

Modular enhancements selected according to the needs analysis and your budget.

✓ Devices: laptops, tablets and ICT starter kits

✓ Connectivity: data bundles, Wi-Fi enablement and internet support

✓ Business communications: VoIP calling and Teams integration

✓ Professional email hosting and domain registration

✓ Website development and hosting packages

✓ Advanced cybersecurity training, templates and policy packs

✓ Accounting software set-up and training (Sage / Xero readiness)

✓ Branding starter kit: logo refresh, company profile, business cards

✓ Procurement onboarding document completion

✓ Supplier directory and corporate profiling packs

Add-ons are quoted separately and scoped to your cohort.

Clear roles. Clear approvals. No surprises.

Every engagement is governed by the same standards, whatever the scope.

You approve every key decision and every asset. We manage the delivery.

1

SCOPE & APPROVALS

- An agreed statement of work sets beneficiaries, deliverables, timelines and investment. One designated contact on your side approves each milestone.

2

CONSENT & DATA PROTECTION

- No beneficiary is filmed, photographed or named without written consent. Personal and business information is handled in line with POPIA.

3

OUR DELIVERY TEAM

- A dedicated Thriving Network programme lead, supported by specialist facilitators, mentors, technology partners and production crews selected for each engagement.

4

REPORTING & EVIDENCE

- Monthly progress reports, milestone tracking and a final evidence pack, with an impact presentation to your stakeholders.

Structured delivery your governance, verification and communications teams can rely on.

We work inside the ESD ecosystem — not around it.

We develop businesses and document their progress, so we understand both sides of every ESD story.

We understand the context behind the story — who was supported, who invested, what changed, and why it matters.

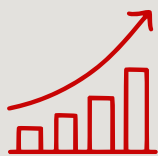

ESD Experience

- We have delivered SME development programmes for corporates.

Tailored, Not Generic

- Every business starts with a needs analysis, so support fits the business rather than the business fitting a programme.

Evidence You Can Stand Behind

- We report what we can verify, with consented, documented progress for every business.

A Distribution Network, Not Just a Camera Crew

- 80,000+ community reach and 4,000+ entrepreneurs engaged, so stories reach the audiences ESD is built for.

We build the businesses. We show the impact.

Turn this into a tailored partnership.

A focused working session is the bridge between this proposal and a production-ready plan for your programme.

1

WORKING SESSION

Understand your ESD objectives, budget, target beneficiaries and 2027 priorities.

2

CONFIRM SCOPE

Agree supplier or enterprise development, the tier and any add-ons.

3

SELECT TIER

Recruit and select businesses aligned to your criteria, then run the needs analysis.

4

PRODUCTION PLANNING

Lock the 12-week schedule, delivery team, reporting and amplification plan.

PROPOSED OUTCOME → An agreed track, tier and implementation plan for your ESD programme.
